Subject: Proposal submission — RFPS-NYH-2026-503931 — KlimaGuard Kids

Dear Members of the Evaluation Team,

Sustainow Technologies Private Limited (CIN U72200KA2025PTC199691), a women co-founded technology company registered in Bengaluru, India (a UNICEF programme country), is pleased to submit this proposal under **RFPS-NYH-2026-503931 UNICEF Innovation Fund Investment Call for Open-Source Applications** for our solution **KlimaGuard Kids**.

KlimaGuard Kids is an MIT-licensed, open-source agentic platform that converts live climate and air-quality signals into child-centred health preparedness guidance. Eight transparent software agents produce location briefings, age-banded guidance (5–17), India Child Health Impact Scores across 77 regions, and privacy-light kids play missions—without requiring child accounts.

We request equity-free seed investment of **USD 100,000** for a 12-month programme to (1) generate field evidence with schools and community health partners, (2) harden the product for multilingual, accessible, offline-capable deployment, and (3) deepen open-source interoperability and documentation for UNICEF and country partners.

This submission includes completed Annex C Templates 1–7, organization chart, CVs of directors, and references to our public repository and technical commendation PDF.

Repository: <https://github.com/carbonintelli/KlimaGuardKids>

Live demo: <https://klimaguardkids.sustainow.in/>

We confirm proposal currency **USD** and validity of at least **180 days** from the submission deadline (10 August 2026, 23:59 CEST).

Yours sincerely,

Purushothaman Manjula Devi
